

Planet Joy is the world that has always been here, in our homes, right in front of us. We were just too busy to see it. Every week, new exciting creatures, unique buildings and objects that make Planet Joy so special, will be released. You can use these instructions and build them yourself. Use any material you have, even waste is great!

If you didn't print this, a kind neighbour of yours decided to print an extra copy of these instructions and bring it to you!

Story:
Hi, Hi, Hi, Hi,
we are here to save your food from getting cold! Man, this is lots of work!
Take care, we are watching you!

Materials:
Toilet paper cardboard tube, Paper (pick a color you like), Stick Glue, Semitransparent Tape, Scissors, Marker, String.

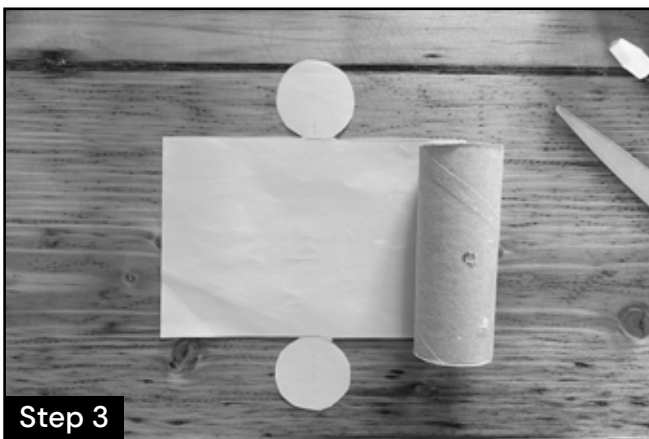

Step 1

Take as many cardboard tubes as you like and make 2 opposite holes in each of them to keep them together using a string.

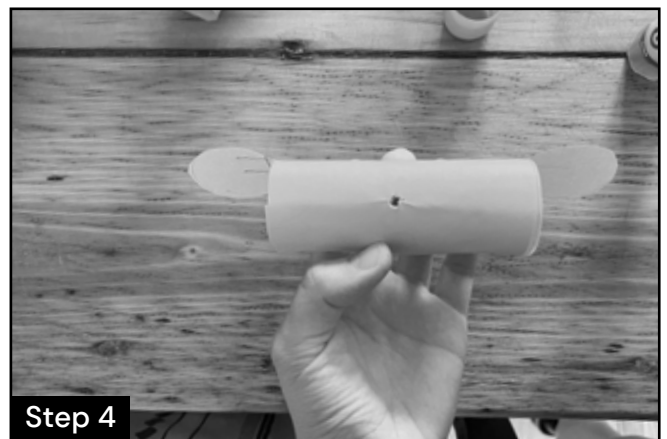

Step 2

Draw out the pattern to cover the roll, based on its height and diameter.

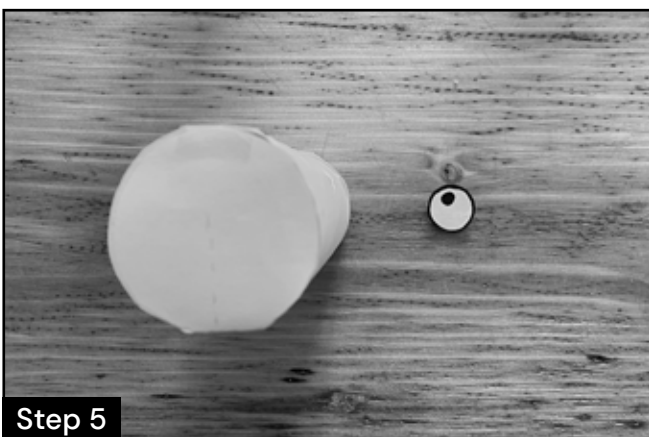

Step 3

Trim out the right shape to cover each of your rolls.

Step 4

Glue the paper to the roll, remembering to mark out where the holes are.

Step 5

Draw the eye on a bit of paper and glue it on the front side of the roll. Repeat this for all the rolls you used.

Step 6

Insert the string into the holes and use it to keep all the Heatsavers together.
