

Planet Joy is a world hiding in plain site, a world in our own homes that we've been too busy to notice. Every week, exciting creatures, unique buildings, and strange objects will be released! You can use these instructions to re-build them yourself, using any material you have, even waste! Don't forget to send us a snap!

If you didn't print this, a kind neighbour of yours decided to print an extra copy of these instructions and bring it to you!

Name:
Squarrel

Creator:
Carlotta Periti

Story:

Squarrel is exactly what you would expect from a squirrel: a nuts and seeds lover, but he is fond of sharing as well. Have some nuts together! When his tummy is full of hulls, you can empty it and start again!

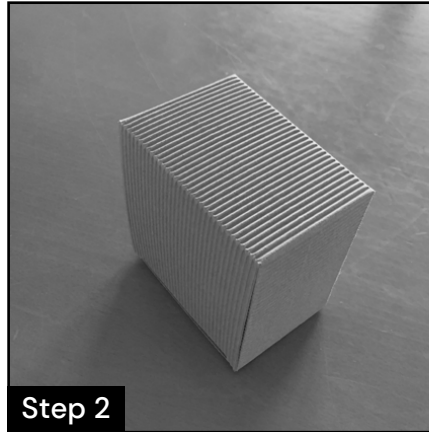

Materials:

1 plastic bottle, a tiny cardboard box, spare pieces of cardboard and a corkscrew, a marker and a handful of hazelnuts.

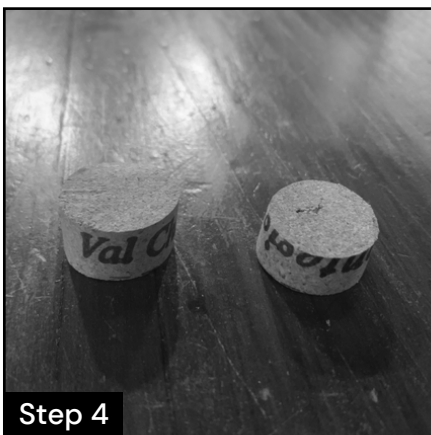

Step 1
Cut the bottle both on the top and the bottom, as shown in the pic, to create the backpack.

Step 2
Look for a tiny rectangular box or make one.

Step 3
Cut the corkscrew in two short cylinders, as shown in the pic.

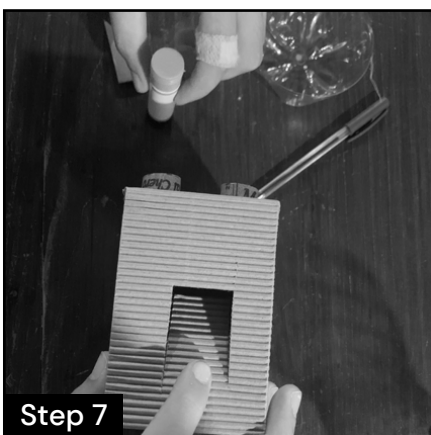

Step 4
Draw the eyes on the cork, then draw nose and mouth on the front side of the box.

Step 5
Using the bottle's diameter, trace a circle on a piece of cardboard and cut it out.

Step 6
Attach it to the bottom of the bottle to close one end of the backpack.

Step 7
Cut a slot on the top of the box. It will make a container for the hulls.

Step 8
Make the ears with cardboard, and attach the backpack to the back of the box.
